

All services all the way up to the start of production

With the remodelling of a factory or a production facility, the modernisation of production, the relocation, and the world-wide relocation of production, all services and activities aim to meet one objective:

The Start of Production on-time - cost-effectively - quality compliant

Providing a full service spectrum in terms of factory planning and relocation, Mehler Engineering + Service GmbH is internationally specialised in machinery for lacquering, laminating, printing, and finishing for the plastics, packaging, and textile industries.

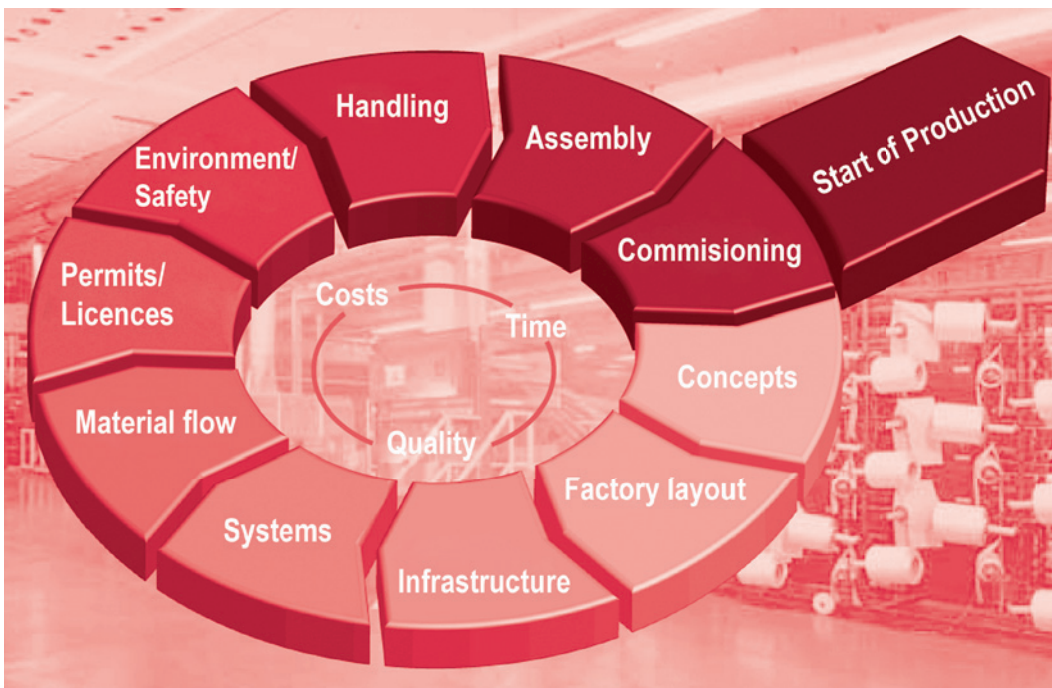

MES | *systems*[®]
... more than drying systems

MES | *comtec*[®]
... more than pilot installations

MES | *thermsol*[®]
... more than heating systems

MES | *process*[®]
... more than control engineering

MES | *master*[®]
... more than plant relocation

We will not only tend to the production facility but the entire infrastructure including the energy supply, operating equipment, environmental issues, waste water, climate control, storage, and the materials handling technology required for operation completed with project planning and permits.
